

# Professional Summary

---

Frontend Developer with 5+ years of experience building scalable and high-performance web interfaces using React, Next.js, Vue, and TypeScript. Proven track record in e-commerce platforms, multilingual websites, AI systems, and dynamic search implementations using Meilisearch. Strong problem-solving skills, reusable component architecture, teamwork, and crisis management capabilities.

## Work Experience

---

### ↩ Frontend Developer | Quarkino (Remote) | May 2023 – Present

- Proposed and led roadmap for migration from Vue 2 to Next.
- Designed scalable architecture and reusable service layers for cross-project
- Developed RESTful client-side services using React Query
- Built complex multi-step and reusable forms using Zod, React Hook Form, and ShadCN
- Fully implemented the checkout and payment system for Dipoint (cash, installments, wallet)
- Created a real-time dashboard with live updates using WebSocket
- Developed advanced dynamic filters integrated with Meilisearch
- Improved search performance from 600ms to under 250ms
- Designed and built an end-to-end AI chat web app (frontend and backend) using Laravel, Next.js server, and OpenAI ChatGPT API
- Participated in team hiring, onboarding, mentoring, and issue troubleshooting

### ↩ Frontend Developer | Yasna Team (Web Application Development) | 2021 – Present | Remote

- Maintained and developed over 8 websites and built 4 new projects from scratch using Vue 2
- Implemented authentication pages (JWT, Google OAuth2, social logins), dashboards, blogs, etc.
- Maintained and optimized a custom CMS built with Vue 2

### ↩ Frontend Developer | Ostad Bank (Private Tutoring Platform) | 2020 – 2021 | Remote

- Developed web applications using Nuxt.js

### ↩ Frontend Developer | Hoom-IT (Web Application Development) | 2019 – 2020 | Remote

- Built web applications using Vue 2

# Highlighted Projects

- **ICIB**: International 10-language platform with advanced search using Meilisearch, real-time analytics dashboard via WebSocket (Bugsy), and multi-step forms. Supports video, audio, and text chat.
- **Adlieh AI**: Full-stack AI chatbot platform (Laravel + Next.js API + ChatGPT) – early-stage production with significant technical complexity.
- **Depoint**: Built installment/cash shopping cart system, wallet, and admin dashboard. (Company revenue: 100+ billion Toman/year)

# Skills

- **Languages & Frameworks:** React.js, Next.js, Vue.js, Nuxt.js, TypeScript, JavaScript, Html
- **UI & Styling:** Tailwind CSS, ShadCN, SCSS, Vuetify, Bootstrap, Responsive & Pixel-perfect Design
- **State Management & Forms:** React Query, Zustand, React Hook Form, Zod
- **Next.js Features:** SSR, SSG, ISR, Action Api, Api route
- **Testing & Code Quality:** Jest, TDD, ESLint, Prettier
- **Backend:** Laravel, Node.js, NestJS, Prisma, Django, REST API, GraphQL
- **DevOps & Tools:** Git, GitHub, Docker, CI/CD, Linux
- **Other Languages:** Python, PHP (Intermediate proficiency)
- **Additional Interests:** Financial markets, trading bots, and proxy panel management

## Achievements

Ranked 25th in National Master's Entrance Exam (2019)

Member of University Robotics Team

## Education

M.Sc. in Electrical Engineering (Control)  
University of Tehran | 2019 – 2022

B.Sc. in Electrical Engineering (Power)  
Bu-Ali Sina University | 2012 – 2017

## Languages

Persian (Native)

English (upper Intermediate)

German (Beginner)

# About Me

- I began programming in 2014 with C and have been a self-taught developer ever since. I'm passionate about continuous learning and have experience in diverse domains, including AI, blockchain, financial systems, and web development.
- Known for strong teamwork, crisis management, decision-making skills, and the ability to learn and solve problems quickly.
- I thrive on challenges and bring high energy and responsibility to every project I take on.
